To whom it may concern,

RE: G2 Construction

We are pleased to provide this letter of reference for G2 Construction.

G2 Construction was awarded the contract to build our third fire station, "Station 430". We are so thankful and appreciative of the entire team at G2 Construction for everything they have done for us, and the world class construction and customer service they provided.

Throughout the entire project they took the time to answer an enormous amount of questions from us, on almost every aspect of the project. Their experience in construction and project management shined through at every step.

G2 Construction's innovativeness throughout the entire process assisted us with getting features we previously thought were unattainable due to our budget concerns/constraints. G2 Construction continually was an advocate for us here at the fire district and I cannot thank them enough for this.

All of this was completed during the COVID-19 pandemic, when many of us were very concerned about what that might mean to the project. If they can do this during a pandemic, I cannot even begin to imagine what they are able to accomplish outside of these difficult times.

These are only a few of the reasons that I highly recommend G2 Construction for your construction project. It was an extreme pleasure to work with everyone at G2 Construction and I hope that we can work with them again in the future.

If you have any questions or require further information, please do not hesitate to reach out to me. PCarlyle@bcfd4.org or 509-967-2945

Respectfully submitted,

A handwritten signature in blue ink, appearing to read "Paul Carlyle".

REF: Letter or Recommendation

To whom it may concern:

It has been my pleasure to engage with G2 Construction over the past year and a half in designing, budgeting, and building a 7400 sq ft Pediatric Dental and Orthodontic clinic in the Tri-Cities area. Besides providing excellent construction services the best part about working with G2 is their exceptional customer service and support. Their entire team is congenial, informative and pro-active on the project. Working across table with our architect, landscape architect, interior designer and numerous subcontractors, they provided rapid communication and multiple offerings and opinions on how the project could be improved and material and construction costs brought down. Having started this project in the middle of the Covid Pandemic their expertise in alternative sourcing of materials. Having what I call a three-dimensional view of the project, they were able to shave costs without compromising the quality, functionality and esthetic core of the building and surrounding green spaces.

Our project came in right on budget and within 2 weeks of the original projected completion and occupancy date despite numerous changes made by the city and county planners, a financing challenge at the funding bank and, of course, all the challenges the pandemic created. G2 never once delayed moving the project forward and continually sought unique and innovative solutions to the challenges dropped on us as a team. The end result was on time delivery of an exceptional professional building with an impeccable esthetic adding to the community at large.

I cannot recommend G2 Construction and their services any more highly than stating we are progressing toward a second build, and we are seeking no other bids because **G2 delivers**, and that peace of mind is priceless. Thank you G2 and each of your incredible team members (Ami, Tyler, Andy, Brad, Oscar, Dave, Steve, Linsey and, of course, Chloe!) for making a tough build in a tough year pleasurable and successful.

Gratefully submitted,

J. Kyle House, DDS, FAAPD, FACD
